### Knooppunten route

38Hunebedcentrum, Hotspot Buunerbult

44

13

20Hotspot Hunzebos

9

39

38

6Hotspot Leewal

This remarkable ridge in the landscape has most recently been interpreted as an esker, which is a ridge formed by melt water carrying sand and gravel inside or underneath a glacier. However, discussions about its true nature are still ongoing.

24

Turn right on the 'Hoofdstraat' (main street) in the direction of Exloo and take the second turn left into the 'Boslaan'.

23Gletsjerkuil

Hotspot Buinerveld: Gletsjerkuil (Glacial hollow)

28

Cycle in the direction of node 43 until you reach the Hunebedcentrum parking lot on your left. This is the finish of this tour.
